

COMAPANY PROFILE

Elite Oilfield operates as a professional trader specializing in lubricants, pipes, tubes, fittings, and valves, boasting over a decade of experience in **Egypt, UAE & Iraq.**

ABOUT US

Elite Oilfield operates as a professional trader specializing in lubricants, pipes, tubes, fittings, and valves, boasting over a decade of experience in Egypt UAE & Iraq.

We cater to the Oil, Gas, Petrochemical, and Power Generation sectors, with our headquarters situated in Sharjah, UAE, and a branch in Egypt equipped with two warehouses: Suez Warehouse spanning 3,000 square meters, and Cairo Warehouse covering 1,000 square meters.

Our inventory is meticulously sourced from reputable ISO 9001, ASME, and PED accredited suppliers across the USA, UK, Italy, South Africa, China, and India.

Committed to superior sales and after-sales service, we prioritize punctual delivery and stringent quality assurance, placing the utmost importance on customer satisfaction.

While we offer premium oil and gas products, our value extends beyond mere transactions. Collaborating with us grants you access to unparalleled industry expertise. Our team ensures that you not only receive meticulously researched and precision-manufactured products but also benefit from rigorous testing and the support of seasoned engineers and product specialists with extensive field experience. Thus, you can trust in both our team's capabilities and the quality of our offerings.

MISSION & VISION

Our Mission

Our core business revolves around being a physical supplier of oil and gas products. Through strategic investments, we continuously fortify our assets and relationships, enhancing our trading operations for both the present and future. The Elite Oilfield way of conducting business delineates our actions and aspirations, fostering a shared understanding among our workforce and all stakeholders.

Our Vision

Embedded within the Elite Oilfield ethos is our vision to emerge as a globally integrated Energy Company renowned for its people, partnerships, and performance. Grounded in our values and relentless efforts, we tackle challenges with integrity and creativity, leveraging our ingenuity to uncover unconventional yet pragmatic solutions. We remain steadfast in our pursuit of novel opportunities and unconventional approaches, striving for excellence in all endeavors.

PRODUCTS

HIGH-QUALITY LUBRICANTS AND GREASES

With the advancement of the industrial marketplace, the progress in automation, and the expansion of manufacturing facilities, machinery has enjoyed a tremendous leap forward. Lubrication technology has contributed in many ways to this advancing technical evolution. Lubrication systems can consolidate multiple lubrication areas and control lubricant usage. At Elite Oilfield, we emphasize a major part of preventive maintenance, which helps our customers increase their profitability. Moreover, our wide range of products covers transmission oils, industrial gear oils, hydraulic oils, compressor oils, grease, etc.

INSTRUMENTATION FITTINGS: HIGH AND LOW PRESSURE

Instrumentation components are critical to the operations of the plant or a product grouping. Fittings, valves, and tubing are the veins and arteries of the instrumentation system. Elite Oilfield covers high-quality fittings with different materials like carbon steel, stainless steel, super duplex, and Monel, which are used to transfer, measure, and control system flow, pressure, temperature, and provide system calibration.

PIPES AND TUBES

At Elite Oilfield, we understand that specialization leads to improved product quality, productivity, and production efficiencies. That's why we fundamentally focus on trading the best quality pipes and tubes with different grades and materials, tubes, butt weld fittings, and fabrications, etc. Our specialization gives us the best opportunity to embrace the latest technologies and best practices, keeping our business competitive while ensuring the highest product quality standards are maintained.

PRODUCTS

VALVES: HIGH AND LOW PRESSURE

As traders at Elite Oilfield, we offer an extensive product range for reliable performance of valves, which includes needle valves, ball valves, check valves, proportional relief valves, and unique solutions. Our unmatched engineering and technical expertise provide you with pressure management products, application solutions, and services that will positively impact your business.

TOOLS AND ACCESSORIES

At Elite Oilfield, we represent tools and accessories engineered for high performance. In addition to pioneering design, high-impact technology, and durability, we prioritize customer satisfaction. Moreover, we provide gas inspection gauges, tube benders, plastic clamps, tube cutters, etc.

MARINE VALVES

Elite Oilfield's expertise and extensive availability of marine valves, offshore valves, and ancillary products make us your ideal partner for all your marine, shipping, and offshore requirements. Many marine valves we offer are type approved or can be pressure tested and witnessed by a classification society. These include different grades and materials of globe valves, gate valves, check valves, etc.

STUDBOLTS AND NUTS

At Elite Oilfield, we distribute petrochemical-grade stud bolting, nuts, and special fasteners for the oil and gas, petrochemical, marine, and construction industries. Moreover, we handle most of the common sizes and grades and are capable of delivering specific sizes in very short lead times. This service can assist with projects that have immediate requirements, ensuring that downtime is kept to a minimum.

SERVICES

Our flexible services programs provide reliable equipment needed for upstream operations, including

- Fabric Maintenance and Corrosion Protection
- Marine and Fireproofing Coatings
- Rope Access Solutions
- Specialist Rigging and Scaffold Supply
- Derrick Inspections / Drops Surveys
- Bolt Torquing, Tensioning, and Replacement
- Abrasive Blasting
- UHP Water Blasting
- Tank Cleaning
- Specialized Labor Training and Marine Crew Assignments
- Sheeting, Cladding, and Thermal Insulation
- Lifting Gear Inspections and Load Testing
- Valve and Gauge Certification and Calibration
- Drone Inspection, etc.

SERVICES

OIL AND GAS ENGINEERING SERVICES

Our company offers comprehensive oil and gas engineering services tailored to meet the diverse needs of the industry. With a team of highly skilled engineers and specialists, we provide innovative solutions across various facets of oil and gas exploration, production, processing, and distribution. Our services encompass:

1. Feasibility Studies and Conceptual Design

- Conducting thorough feasibility studies to assess the viability of oil and gas projects.
- Developing conceptual designs that outline the technical and economic aspects of the project.

2. Front-End Engineering Design (FEED)

- Executing detailed engineering studies to define project scope, budget, and schedule.
- Developing engineering deliverables to facilitate project execution and procurement activities.

3. Process Engineering

- Designing and optimizing oil and gas production processes to enhance efficiency and productivity.
- Conducting process simulations and analyses to identify potential improvements and optimizations.

4. Mechanical Engineering

- Providing expertise in the design and specification of mechanical equipment and systems.
- Ensuring compliance with industry standards and regulations for the safe and reliable operation of equipment.

SERVICES

5. Electrical and Instrumentation Engineering

- Designing electrical and instrumentation systems for oil and gas facilities.
- Implementing automation and control solutions to optimize operations and ensure safety.

6. Pipeline Engineering

- Planning, designing, and managing the construction of pipelines for oil and gas transportation.
- Conducting risk assessments and integrity management to ensure the integrity and reliability of pipeline systems.

7. Project Management and Execution

- Overseeing the execution of oil and gas projects from inception to completion.
- Managing project schedules, budgets, and resources to deliver projects on time and within budget.

8. Regulatory Compliance and Environmental Engineering

- Ensuring compliance with regulatory requirements and environmental standards.
- Implementing measures to minimize the environmental impact of oil and gas operations.

By leveraging our expertise and experience in oil and gas engineering, we strive to deliver value-added solutions that optimize performance, minimize risks, and maximize returns for our clients.

SERVICES

PIG LAUNCHER AND PIG RECEIVER SERVICES

Our company offers comprehensive pig launcher and pig receiver services, vital components in the maintenance and operation of pipelines within the oil and gas industry. Pigs, also known as pipeline inspection gauges, are devices inserted into pipelines for various purposes, including cleaning, inspection, and maintenance. Our services encompass:

1. Design and Engineering

- Customized design and engineering of pig launcher and pig receiver systems tailored to the specific requirements of each project.
- Utilization of advanced design software and modeling techniques to ensure optimal performance and reliability.

2. Fabrication and Manufacturing

- Fabrication and manufacturing of high-quality pig launcher and pig receiver systems using state-of-the-art facilities and equipment.
- Adherence to industry standards and regulations to guarantee the integrity and safety of the equipment.

3. Installation and Commissioning

- Professional installation and commissioning of pig launcher and pig receiver systems at client sites.
- Thorough testing and inspection to verify proper functionality and performance.

SERVICES

5. Retrofit and Upgrades

- Retrofitting and upgrading existing pig launcher and pig receiver systems to enhance performance, efficiency, and safety.
- Implementation of advanced technologies and innovations to optimize system functionality.

6. Training and Support

- Provision of training programs and technical support to client personnel on the operation and maintenance of pig launcher and pig receiver systems.
- On-site assistance and troubleshooting to address any operational challenges or issues.

7. Compliance and Safety

- Compliance with industry regulations and safety standards to ensure the safe and environmentally responsible operation of pig launcher and pig receiver systems.
- Implementation of best practices and procedures to mitigate risks and prevent accidents or incidents.

By offering comprehensive pig launcher and pig receiver services, we aim to support our clients in optimizing the performance, efficiency, and integrity of their pipeline systems, ultimately contributing to the safe and reliable transportation of oil and gas products.

OUR PARTNERS

Southey Contracting, Offshore Division

(a Division of Southey Mauritius Ltd) provides specialist access, inspection, maintenance, and manpower supply services to the oil & gas and mineral sectors of West and East Africa. The services provided include corrosion protection, UHP water jetting, abrasive blasting, tank cleaning, scaffolding, thermal non-destructive testing, material inspection services, lifting gear certification, maintenance and engineering solutions, unique access solutions, and marine crew assignments.

Hikelok

is the main product of Sailuoke Fluid Equipment Inc. Their main products include Instrument Process Products, Ultra-high-Purity Products, Ultra-High Pressure Products, Vacuum Products, Process Products, Sampling Systems, Pre-Engineered Subsystems, Tools, and Accessories. They offer stainless steel, alloy steel, brass, special alloy, and carbon steel products. The company's product executive standard includes ANSI, ASME, ASTM, API, MSS, ISO, EN, GB, JB, HG, etc. Their products find wide applications in power generation, petroleum, petrochemical, natural gas, semiconductor, laboratory, shipbuilding, steel, chemical industry, and other fields.

With an illustrious history dating back to 1877, GB Lubricants are one of the foremost privately owned manufacturers of premium quality lubricants in the UK. Over the last 130 years, they have developed a distinguished reputation from the northernmost reaches of Scotland, across Wales to the southernmost tip of England. Specializing in Oil & Lubricants, Agricultural lubricants, Industrial Lubricants, and Commercial Lubricants.

OUR PARTNERS

United Steel Industry Group

is a professional manufacturer & exporter of steel pipes in China. Their products include carbon steel pipes (SMLS pipe/ERW/LSAW/SSAW), stainless steel pipes, galvanized steel pipes, alloy steel pipes, and related products. They offer perfect service to their customers and bring in the highest quality steel pipes at the most competitive price for their Clients. Their entire operations are focused on the precise demands of their client needs.

WH-STEEL CO.,LTD

is located in Yanshan County, Cangzhou city, Hebei Province, which is the manufacturing base for pipe equipment in China. It is a professional company about pipe fittings equipment products gathering R&D, production, and operating in integral whole. They have the most advanced production equipment and senior engineers. They can make the raw material into finished products and inspect the products before they leave the factory. Additionally, they have the comprehensive capacity to manufacture the pipe fittings, flanges, and pressure vessel products. Their products include high-performance and high-quality pipe fittings with different sizes.

CSI IMPIANTI Its Italian manufacturer for Industry and Plant Engineering

Our expertise spans across various sectors, including production and processing plants (such as petrochemical, steel, and cement facilities), electrical machinery and systems, carpentry structures, energy production systems, lubrication systems, and handling and lifting systems. With a focus on precision and efficiency, we deliver comprehensive solutions tailored to meet the specific requirements of each industry, ensuring optimal performance and reliability.

TECHNOLOGICAL COMPONENTS & INFRASTRUCTURES

In addition to industry-specific engineering services, we also specialize in the development and maintenance of technological components and infrastructures essential for public bodies. Our activities encompass:

- **Aqueducts:** Design, construction, and maintenance of water supply systems to meet the needs of municipalities and communities.
- **Gas Pipelines:** Planning, installation, and management of gas pipelines to facilitate the distribution of natural gas for residential, commercial, and industrial use.
- **Oil Pipelines:** Engineering and maintenance services for oil pipelines, ensuring the safe and efficient transportation of crude oil and petroleum products.
